

The following information is the Idaho State Department of Agriculture policy on Special Local Need (SLN) or Section 24(c) registrations.

There are four items we require with an SLN submission to our Department. These four items are:

- 1) A completed EPA application for an SLN registration;
- 2) A proposed label;
- 3) A letter explaining the request and the need for the proposed use in Idaho; and
- 4) Two copies of the data package supporting the proposed use.

The data package should contain the following information:

- a) Data showing the efficacy of the proposed use;
- b) Data showing what phytotoxic effects, if any, will occur to the crop site proposed;
- c) Pesticide residue data for the proposed food/feed crop. This data should support the current tolerance for that food/feed use; and
- d) Data showing what affects this proposed use would have on the environment. This may include a description of the use site, counties, etc. Also, what aquatic and riparian areas wildlife habitats, and endangered/threatened species will be affected, if any. If any adverse affects may possibly occur, a plan to mitigate risks must also be included in the package.

The Department prefers that all data submitted with the application be prepared under Good Laboratory Practice Standards (GLPS). We require the data to be collected in the same geographic area as the proposed use under the SLN registration. Climatic conditions, geographic conditions and growing conditions are important factors in the results of the data used for SLN consideration.

The Department does a complete review of the SLN data package before making a registration decision. This review consists of: toxicology, worker safety, efficacy, phytotoxicity, residue analysis, environmental risks, ground water and endangered species. Please note it takes 30-60 days for SLN requests to be completely reviewed by the Department.

We appreciate industry input and participation in the preparation and review of these SLN registrations.

There are no additional fees for an SLN registration or review, but we do require that the parent product(s) be registered in Idaho prior to approval of the SLN. The fee for registering a product in Idaho is \$145 per calendar year. Pesticide Registration information may be requested from phone number listed below. You can also download

these forms off of our Homepage on the Internet, located at www.agri.state.id.us. Find the link to Department Forms and Applications and click on it. Click on AG Resources and double click on Pesticide Product Registration Form.

SLN requests should be sent to:
